Notice to Lumbermen.

PERSONS interested in the Reft navigation, are informed that the raising of the middle span of Bangor Bridge, will make it necessary to obstruct the lassin channel of the siver about tree days, commencing on Tuesday the 3th inst. In addition to the present opening of 40 feet through the western for Bangor! span, a space of seventy-five feet will be made through the scaffolding now ander the eastern span, for the passage of ordinary board rafts.

Every exertion will be used on the part of the Bridge Compiany to render the inconvenience as slight as possible to the public; and it is boped, in turn, that no slarge and unmanageable rafts will be allowed to drift down and become entangled with the piers and scaffolding.

THIS Pen received the highest premium at the last fair of the American Instituto, and has been prodounced by the first Teachers of Penman ship in the country, to be infinitely superior to any Gold Pen ever before introduced to the American public. These Pens are limitestructible except by actual violence—no ink will injure them—retain their classicity, and the peculiar shape of the sibs, (which man first introduced by Ragley) makes it more pleasant to use, renders it loss hable to damage, more easy to repair, and prevents the necessity of the great care that other articles of the kind require.
